Paper 2 Rubric

Category	Exceeds Expectations (90-100%)	Meets Expectations (60-89%)	Below Expectations (0-60%)
Length	4-5 pages (1200-1500 words)	>5 pages (>1500 words)	<4 pages (<1200 words)
Recognize Responsibilities (40%)	Describes approrpiate responsibilities of a computer scientist related to the issue being discussed. Includes appropriate citations of ethical or legal principles (e.g. the ACM code of ethics).	Descirbes some ethical and professional responsibilities, but misses some critical ones or does not clearly tie them to the issue being discussed. May not cite appropriate ethical or legal principles.	Does not satisfactirally describe professional and ethical responsibilties.
Make Informed Judgements (40%)	Makes conclusions appropriate for a computing professional working on this project based on the ethical and legal principles cited. Conclusions include consideration of all of global, economic, environmental, and societal contexts.	Makes conclusions that are partially appropriate, but may miss critical aspects. Conclusions include consideration of one of global, economic, environmental, or societal context.	Conclusions are not at a level appropriate for a senior computing student.
Tone (10%)	Writing is aimed at appropriate level - this report could be submitted to a project manager.	Writing is overly formal or colloqial, may use contractions or not clearly define acronyms.	Writing is not at a satisfactory level for a senior computing student.
Formatting (10%)	Markdown file is exported to pdf professionally using e.g. pandoc and makes use of all of lists, hyperlinks, and images.	Markdown file may not be professionally exported to pdf. It may make use of only one of lists, hyperlinks, and images.	Markdown file is not exported to pdf, or formatting is not at a level appropriate for a senior computing student.
